

The work of the artist

Veronika Richterova

Mosaics

Paintings

Enamels

Work with plastic bottles

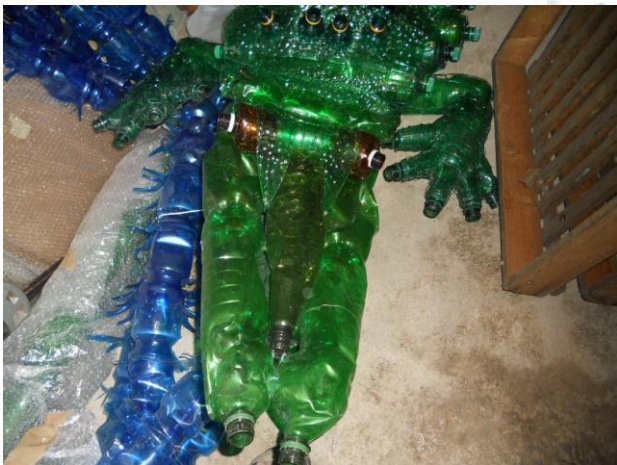

In her work she uses only plastic bottles . Her favourite themes are animals and flowers . When exposed they match with the natural enviroment

Animals

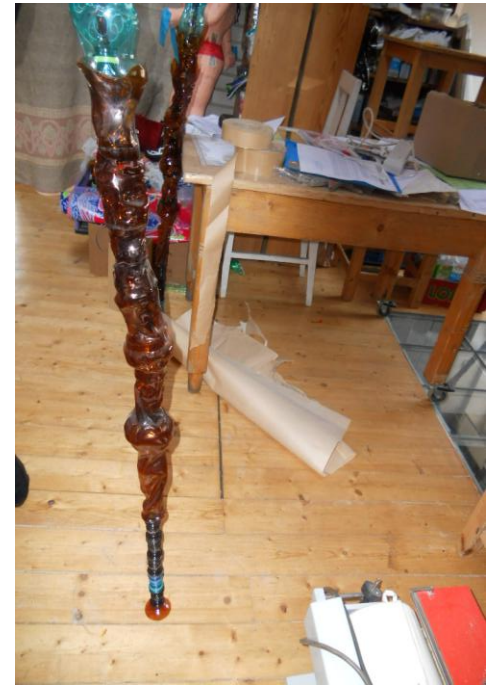

The crocodile

In her studio we saw also this huge crocodile that is made entirely of plastic bottles and is able to float in the water . The connection between the bottles is not with glue or a special machine but simply with wire

The spider

One of the most inspiring pieces of her work is this spider that is going to be in her next art exhibition , together with a smaller one she had made some years ago .

Bug

Monkey

Flowers

Flowers are also a very common theme in her work .

Flowers of paradise

Other plants

Various others

Chandeliers

Mirrors

Installations

Future work

In her next work she will help children get familiar with her work by creating butterflies from plastic like the one in the picture . After that they will create a huge piece of art by putting all the butterflies together in the wall .
