

Final Project Requirements

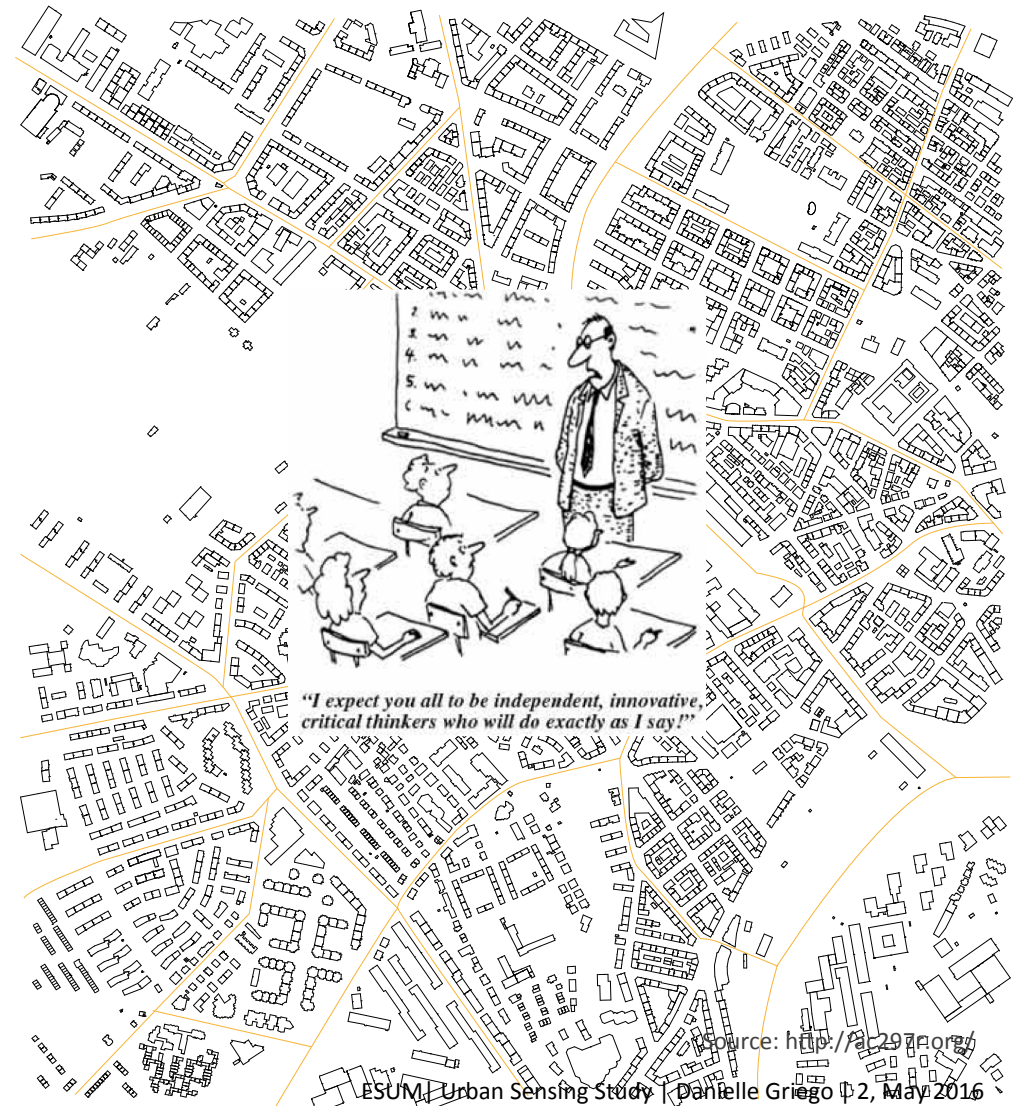

- Formulate 1-2 specific question(s) of interest to you
- State your hypothesis/expected outcome based on supporting literature (minimum one source) your expertise, and intuition
- Answer that question through your analysis, for this:
 - Select the best available data sources for your question (minimum of 2 data sources)
 - Include a time series and/or clustering analysis
- Summarize your results
 - Show a clear conclusion, does your analysis answer your question(s)?
- Conclusions
 - Lessons learned
 - If you had more time, if you were to run the study to answer your question you would.....
 - Collect additional data, have different types of participants, ask different/ additional questions, etc.
- Also include sources of inspiration and references

Update: you may choose to pair-up and work in 2's
